JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Reports from South Atlantic Quarantine Station, Ga.—Smallpox on Sapelo Island.

Passed Assistant Surgeon Gwyn reports, June 2 and 4, as follows:

Smallpox is present on the island of Sapelo. The patient is an infant, age 3 weeks, whose parents have just recovered from the disease.

The secretary of the Georgia State board of health and the health officer at Darien will be notified by this mail.

Further information indicates that the disease was imported from Brunswick, Ga. Two relatives of the family came from Brunswick several weeks ago. Both had the eruption well marked at the time. One was said to have been quite sick. After their recovery they left the settlement, destination unknown. The disease has probably been present for more than a month, with 5 cases and no deaths. Several laborers from this settlement are engaged in loading the lumber vessels on Front River, about 13 miles distant. There is a turpentine camp very near the settlement, but I understand that most of the laborers employed there have left.

Quarantine at New Orleans against Ceiba, Honduras.

The following is received from Dr. C. H. Irion, president of the Louisiana State board of health:

June 8, 1906: Have established quarantine against all passengers from Ceiba, Spanish Honduras, effective this date, vessels in transit excepted.

STATISTICAL REPORTS OF STATES AND CITIES OF THE UNITED STATES,
YEARLY AND MONTHLY.

CALIFORNIA—*Stockton*.—Month of May, 1906. Estimated population, 20,000. Total number of deaths, 19, including 3 from tuberculosis.
